MESSAGE

"Embrace change, bid farewell to the past, and step into the unknown with optimism. Navigate life's uncharted waters with resilience, cherishing laughter and celebrating success. May your journey be a canvas painted with vibrant experiences. Cheers to new beginnings, growth, and the unwritten chapters waiting to unfold. Here's to a year filled with joy, triumphs, and the pursuit of dreams. Wishing you a remarkable journey ahead!"

SIRC Chairperson's Message

Dear CA Students,

As we usher in the dawn of a new year, it is my privilege to extend warm greetings to each one of you. This past year has been a testament to your resilience, commitment, and the unwavering pursuit of excellence in the field of chartered accountancy.

As Chairperson, I am humbled by the collective achievements and milestones we have reached together. The journey of a CA student is not merely an academic pursuit; it is a transformative experience that molds individuals into professionals equipped to navigate the complexities of the financial world.

In the spirit of the new year, let us not only reflect on our triumphs but also embrace the challenges that lie ahead. Each obstacle is an opportunity for growth, and your dedication to this noble profession positions you to overcome any hurdles that may come your way.

Let us foster a sense of camaraderie, support one another, and collectively strive for excellence. Remember, our success is not only measured by the marks we obtain but by the knowledge gained, skills honed, and the ethical foundation we uphold.

May the upcoming year be filled with enlightening insights, successful endeavors, and a deep sense of fulfillment in your academic pursuits. As CA students, you are not just preparing for a career; you are shaping the future of finance and contributing to the integrity of our profession.

Wishing you all a Happy New Year filled with learning, growth, and unparalleled success.

Best regards,

CA Divya S

Chairperson, Bengaluru Branch (SIRC)

SICASA Chairman's Message

Dear Esteemed CA Students,

As we bid farewell to the year gone by, I find myself standing on the threshold of excitement and anticipation for the journey that awaits us in the coming year. It is with great pleasure and privilege that I extend my heartfelt wishes to each of you. Our community of CA students is more than just a group of individuals pursuing a common goal; it is a dynamic force driven by passion, tenacity, and the pursuit of knowledge. In the ever-evolving landscape of finance and accountancy, your dedication to staying at the forefront of these changes is truly commendable. The dawn of a new year invites us to not only reflect on the challenges we've conquered but also to envision the possibilities that lie ahead. Let us embrace the unknown with enthusiasm, for it is in those uncharted territories that we discover our true potential.

I encourage you to approach the upcoming year with a spirit of curiosity and resilience. Your journey as CA students is a transformative one, and each experience, whether triumph or setback, contributes to your growth. May the coming year be filled with moments of inspiration, aha-moments of understanding, and the joy of conquering new intellectual heights. Remember, the essence of being a CA student is not just in the pursuit of a qualification but in the continuous pursuit of excellence and the embodiment of ethical practices. Wishing you all a New Year filled with determination, discovery, and the fulfillment of your academic aspirations.

Best regards,
CA Tuppad Virupakshappa M
SICASA Chairman, Bengaluru Branch (SIRC)

**Just like the way you
wanted**

**Geetanjali J
SRO0522030**

Years from now you'll realize why everything happened for a reason, you'll realize that all the colours that looked grey were unseen solid magical colours of new beginnings, colours that will somehow blend in and bring out a new rainbow just like golden sunshine after rain

Years from now you'll also realize that everything had a purpose, those tears that were shed behind the closed doors will also be the same eyes that will hold strength and resiliency.

Your fingers that once held tremors will be the same fingers that will now hold stillness. You'll dance, laugh, cry, and appreciate every single thing that comes your way. Be it good or bad, you'll be able to handle every single thing.

This time your smile is not only for you but for the world to see, your heart will be filled with so much love that it might be ready to burst. You'll have so much love to give because your newly healed heart is ready and this time your heart will only accept soft love.

You'll no longer care about the people who once held your gentle heart and crushed it right before your eyes because your soul will have healed to an extent where their presence doesn't hold any relevance and you forever will wish them the best.

All the wrong decisions will eventually lead you to the right ones and you'll finally meet the one who will hold your soft heart with so much love that you'll wonder for months how lucky you got, someone who will seep into your life in a fleeting moment and turn into something permanent.

Your love will fill them to the brim and you'll watch them come alive just for you to be finally whole.

All the darkness would fade into oblivion leaving you only crumbs of important lessons and your pain will no longer matter.

You'll eventually realize that you are no longer a person who was filled with hatred for the world and yourself. You'll stand right back after a series of falls and finally take that leap, and as you take that leap you'll watch your own story unfold before your eyes.

You'll eventually grow into the person you were always meant to be, someone with so much love to give, someone whose face could light up someone else's dark world, someone who would fight with the world to just hold your hand.

You'll love and fill yourself to the brim that grey colour will suddenly burst out into colours when you realize your self-worth.

Someday all these will turn into a reality like just the way you wanted.

Geetanjali J

Algorithmic Accounting: The Future is Here

Forget the cobwebs clinging to forgotten ledgers, the future of finance is here, armed with algorithms and powered by AI. This is no futuristic fantasy; it's the present reality urging you to embrace the potential of technology and unleash your human power to redefine the very landscape of finance. But as AI's ascent gathers momentum, its growing prominence has sparked several concerns. One such pressing inquiry to have emerged is: Might it one day outstrip human capabilities, endangering the job market? Before we answer the burning question, let us see what AI is and then analyse its impact on specific professions, particularly the realm of Chartered Accountancy.

Understanding AI:

In plain terms, Artificial Intelligence(AI) involves machines that perform tasks which humans can do but often do them more efficiently, accurately, or rapidly. For example, consider image recognition. Humans can identify objects in pictures, but AI can do this at a much larger scale and with incredible speed. Does this mean that with cameras installed at traffic lights detecting traffic rule violations faster and more efficiently, there might be a future without the need for traffic cops? No, automated systems can efficiently monitor and enforce traffic rules, but the role of traffic cops may shift to managing more complex situations, providing assistance, or overseeing the technology itself. However, the need for human judgment in certain situations or unforeseen events might still require human intervention. So, while technology can enhance enforcement, entirely replacing traffic cops might not be the only outcome.

AI and Chartered Accountancy:

Now let us look at the connection between AI tools and the future of Chartered accountants. Can AI be integrated into an accountant? Yes, here is why. Firstly, a significant part of accounting duties involves repetitive or routine tasks that are suitable for automation. Additionally, accounting heavily relies on mathematics, calculations, and compliance with laws, which align with the elements of AI. The integration of AI tools and the future of Chartered Accountants are closely linked. Incorporating AI tools into accounting practices profoundly shapes the future landscape for accountants. These technologies not only change how accountants work but also redefine their roles and responsibilities.

Transformation in accounting practices:

- **Automation of Repetitive Tasks:**

AI's integration into the field of accounting revolutionizes and simplifies repetitive tasks that traditionally occupied a significant portion of accountants' time. Activities such as data entry, reconciliations, and generating reports, previously laborious and susceptible to human errors, are now efficiently performed with accuracy and swiftness through AI-driven tools. This liberation from mundane responsibilities allows accountants to redirect their attention to more strategic and value-added endeavours.

Example: one can use Docyt to automate back-office and accounting tasks and ensure financial control over business.

Another platform called "Bill" can be used to streamline the billing and invoicing process and automate bill payments and approvals.

Similarly, UiPath is a leading Robotic Process Automation (RPA) platform that employs AI and machine learning to automate repetitive tasks like data entry, invoice processing, and report generation. It can handle various accounting workflows, reducing manual intervention and enhancing efficiency.

- **Enhanced Analytical Capabilities:**

AI empowers accountants with robust analytical instruments. Not only do these tools handle immense amounts of financial data at impressive speeds, but also derive practical insights. Through the utilization of predictive analysis, accountants can anticipate trends, identify financial risks, and make well-informed strategic choices. This proactive methodology allows businesses to swiftly adjust to market shifts and thereby, enhance their financial strategies.

Example: Tableau

Tableau is a data visualization tool that utilizes AI algorithms to analyse vast datasets, providing intuitive and interactive visual representations. Accountants can leverage Tableau's AI-driven analytics to unearth trends, correlations, and insights from financial data.

- **Client-Centric Advisory Services:**

The incorporation of AI frees accountants from the confines of pure number-crunching, facilitating their evolution into trusted advisors. Through harnessing AI-driven insights, accountants can offer clients in-depth analyses, strategic counsel, and foresight in financial planning. This transformation shifts the dynamic of the accountant-client relationship from a transactional interaction to a collaborative partnership aimed at accomplishing business objectives.

Example: IBM Watson

Implications for the future:

As computers emerged, many were hesitant to embrace them, fearing the changes they would bring. However, one undeniable truth that has persisted over time is the inevitability of change. Often, people accuse computers of displacing them from jobs. There's some validity in that assertion. Yet, it's crucial to recognize that they replaced the roles of those who were reluctant to adapt to evolving technology and integrate it into their work.

Likewise, AI-powered tools are now in the same position. Embracing them sooner rather than later diminishes the likelihood of being replaced by either advanced technology or individuals who readily harness modern tech. The swifter we incorporate these tools into our workflows, the better equipped we become to navigate the shifts in our professional landscapes, ensuring our relevance in an increasingly technology-driven world.

The integration of Artificial Intelligence (AI) into the realm of accounting does not just represent a present-day evolution; it foretells a future where the synergy between human expertise and technological prowess redefines the profession's landscape. This impending transformation brings forth several implications that herald a new era of accounting practices.

Conclusion:

In conclusion, Artificial Intelligence (AI) presents itself as a versatile tool capable of significantly improving our lives and productivity. Addressing the misconception surrounding AI's potential to displace jobs, its capacity to revolutionize industries and enhance human capabilities becomes apparent. However, while acknowledging the positive transformation it brings, there exists a critical need for conscientious and ethical utilization to ensure its benefits are equitable and widespread. The concern of job displacement is valid, yet the emergence of new employment opportunities within the realm of AI underscores the importance of shaping an inclusive future.

All in all, it's time to go beyond traditional accounting methods and embrace AI to think outside the spreadsheet and drive growth.

News Update

Disabled staff to get quota in promotion with effect from 2016

The Union government on Thursday issued an order paving the way for Persons with Disabilities to be considered for reservation in promotions up to the lowest rung of Group A posts in the Central government, with effect from June 30, 2016. June 30, 2016 is the day on which the Supreme Court had initially ruled that PwD candidates must be entitled to reservation in promotions irrespective of whether the positions were filled through reservation or not.

Suspension of MPs extends beyond the last sitting of Parliament

In a first, the suspension of the Opposition MPs, most of whom were suspended till the end of the Session, has not been revoked since both Houses of Parliament that adjourned sine-die on last Thursday, has not yet been prorogued. The notification to prorogue the two Houses is expected in a day or two, parliamentary sources said. Out of the 146 MPs who were suspended from both Houses, 132 were suspended till “the remainder of the Session”. Three MPs from Lok Sabha and 11 MPs from Rajya Sabha have been suspended pending the report of the Privileges Committees of the respective House.

ULFA pro-talks faction to sign memorandum of settlement with Centre, Assam government

The Union Ministry of Home Affairs and the Assam government are expected to sign a memorandum of settlement with the pro-talks faction of the United Liberation Front of Asom (ULFA) on Friday, a Ministry official said on December 28. Union Home Minister Amit Shah, Assam Chief Minister Himanta Biswa Sarma and 16 leaders of the pro-talks faction of the ULFA, headed by Arabinda Rajkhowa, are likely be present at the signing of the peace pact at North Block on December 29.

Supreme Court Collegium recommends CJs to five HCs

The Supreme Court Collegium headed by Chief Justice of India D.Y. Chandrachud has recommended the appointment of Chief Justices to five High Courts. Justice Manindra Mohan Shrivastava has been proposed for appointment as the Chief Justice of Rajasthan High Court following the recent elevation of Justice Augustine George Masih to the Supreme Court. Justice Shrivastava is currently serving in the Rajasthan High Court. His parent High Court is Chhattisgarh. The Chhattisgarh High Court does not have any representation among the Chief Justices of the High Courts.

China decries Taiwan for ‘hyping up’ military threat, sends warplanes

China’s defence ministry accused Taiwan’s government on Thursday of deliberately “hyping up” a military threat from China for electoral gain ahead of elections on the island in just over two weeks’ time, but again sent warplanes into the Taiwan Strait. Taiwan’s Jan. 13 presidential and parliamentary election will shape the Chinese-claimed island’s relations with Beijing, which over the past four years has ramped up military pressure to assert its sovereignty claims.

Maharashtra sets up COVID-19 task force again

Considering the increase in number of COVID-19 cases daily in the State, the Maharashtra government has once again formed the COVID-19 special task force. The first meeting of the task force was held on Thursday where Health Minister Tanaji Sawant urged people not to panic about the JN.1 variant but follow COVID-19 guidelines, mask up in crowded places during the New Year celebrations and visits to religious places. People with comorbidities are advised to be extra careful. The meeting was attended by district officials and district health departments. The task force would issue a list of medicines and guidelines soon to ensure uniformity in treatment.

Delay in Rajasthan Cabinet formation leaves BJP leaders baffled

The inordinate delay in forming a Cabinet in Rajasthan after the BJP was elected to power earlier this month has left party leaders here baffled. As of Thursday there was no indication about a likely date for a swearing in. Chief Minister Bhajan Lal Sharma who has visited New Delhi twice to meet senior leaders has not thrown any light on the status of the Cabinet either. The delay has especially perturbed young BJP MLAs, many of whom were expecting that they might get an opportunity to serve as Ministers in the same manner as the first-time Sanganeer MLA Mr. Sharma, who was picked for the Chief Minister’s post. However, legislators are not willing to openly stake their claims.

Tharoor hints at 2024 being his last contest

RCongress Working Committee member and Lok Sabha MP Shashi Tharoor spoke on Thursday about providing opportunities for younger people to contest polls, indicating that his upcoming fight from Thiruvananthapuram in the general elections may be his last in the constituency. Talking to reporters on the sidelines of a Congress programme here, Mr. Tharoor, however, said there was no finality about it since it was politics. “I do believe that at some point, the time comes to make room for younger people. And that’s my thinking,” he said.

FUTURE PROOF YOUR CAREER

Objective:
To provide a comprehensive understanding of the transformative role of emerging technologies in the accounting and auditing profession. This webinar aims to equip CA Students, semi-qualified staff, and related professionals with the knowledge and skills necessary to navigate the evolving landscape of digital finance, future of profession and emerging technologies. Participants will gain a strategic edge in adapting to and excelling in the digitally driven world of accounting, insights from artificial intelligence, cybersecurity, IT audits, and the impact of these technologies on career development. The session is designed to foster an environment of learning and professional growth, enabling attendees to stay at the forefront of technological advancements in the field.

Who Should Attend:

- Aspiring and Current Chartered Accountants (CAs): Ideal for those who are keen to understand the impact of digital technologies in the accounting and auditing field.
- CA Students and Educators: Beneficial for individuals in academia who wish to stay abreast of the latest industry trends.
- Accounting Professionals / Semi-Qualified Staff looking to diversify and add new skill sets in your career.

Learning Outcomes:

1. Understanding of Emerging Technologies and Future of Profession: Gain insights into the latest technologies transforming the accounting sector, including AI, blockchain, and data analytics.
2. Proficiency with AI Tools like ChatGPT: Develop a foundational understanding of how AI and tools like ChatGPT can be applied in financial analysis, auditing, and client management.
3. Cybersecurity Fundamentals: Acquire essential knowledge on protecting sensitive financial information and understand the role of CAs in cybersecurity.
4. Understand basics of IT Audits: Learn about IT audit processes, compliance standards (like ISO 27001, GDPR, HIPAA), and their significance in the current regulatory landscape.
5. Career Guidance: Explore various career paths available at the intersection of accounting, auditing, and technology, and understand the skills required to thrive in these roles.
6. Interactive Q&A Session: Engage with industry experts to address specific queries and gain deeper insights into practical applications of these technologies in the accounting field.

Time	Session	Description	Speaker	Duration
5:00 - 5:10 PM	Introduction and Welcome	Brief introduction, overview of the webinar, and introduction of speakers.	ICAI Member	10 mins
5:10 - 5:40 PM	Emerging Technology in Our Profession	Overview of cutting-edge technologies reshaping accounting and auditing.	CA Narasimhan Elangovan	30 mins
5:40 - 6:10 PM	Harnessing the Power of ChatGPT and Other AI Tools	Exploration of AI in finance, focusing on tools like ChatGPT for auditing and analysis.	CA Narasimhan Elangovan	30 mins
6:10 - 6:40 PM	Cyber Security Basics for Accountants	Fundamental principles of cyber security in the context of accounting.	CA Shreynash Kamawat	30 mins
6:40 - 7:10 PM	Navigating the World of IT Audits	Insights into IT audit processes and relevant compliance standards.	CA Sandhya Sridharan	30 mins
7:10 - 7:40 PM	Building a Thriving Career in Accounting and IT	Discussion on career paths at the intersection of accounting, auditing, and technology.	CA Shreynash Kamawat	30 mins
7:40 - 8:00 PM	Conclusion and Q&A Session	Wrap-up of the webinar and an extended interactive Q&A session with the participants and speakers.	CA Narasimhan Elangovan	20 mins
